

Price of installing a double-layer electrical distribution box in a household

Overview

The price for a new electrical box typically combines panel cost, labor, and permitting. In practice, the total project range often falls between about \$1,500 and \$6,500 for a standard residential panel upgrade, with higher costs for larger or multi-branch systems. Main cost drivers include materials, wiring length, and the need for permits or inspections. Whether you are a seasoned procurement officer or a first-time project manager, understanding the distribution box market is about more than just a price tag; it is about safety, scalability, and finding that sweet spot between "cheap" and "reliable."
