

Reasons for the Oversupply of Special Optical Cables

Overview

This isn't a temporary inventory blip; it's a deep-seated supply squeeze driven by a confluence of technological evolution, new applications, and rigid production realities. For engineers, procurement managers, and network operators, navigating this difficult landscape requires a clear. It was reported that FTTH/B dominated the global fixed broadband subscriptions with a share of 66. According to Cru's analysis, prices for fiber have now reached their highest level since July 2019. Input costs for fiber optic cable are adding upward pressure on fiber optic cable prices at a time when demand for fiber technology is high and expected to continue growing.
