

Remote power supply 220V for operator backbone network

Remote power supply 220V for operator backbone network

11. Backbone Networks, MANs, and WANs

Backbone networks are operated by large telecommunications companies, internet service providers, and other organizations, and provide the high-speed data links

Remote Power Panel

Remote Power Panels (RPPs) distribute power directly to the IT server racks or cabinets ensuring continuous operation in critical applications.

The Key to Maximizing Network and Server Uptime

The solution for adding new equipment to existing power supplies is to perform power measurement verification. If, however, equipment units are co-located at multiple sites, then performing on-site
