

Requirements for a self-made three-level electrical distribution box for construction sites

Overview

Choose the right box based on environment (indoor/outdoor), load capacity, and durability. In a newly constructed residential area, a 10kV power line is introduced into the substation. Whether in a home or an industrial facility, this box keeps your electrical setup organized, functional, and efficient. The construction power distribution cabinet is designed specifically for the special situation of the construction site and complies with the relevant construction electricity specifications and standards of the construction department. ENERGYBOX is a complete range of Assemblies for Construction Sites (ACS) pre-wired boards that can be wall-mounted or installed on a support.
