

Robust and Secure AI Servers

Overview

- NVIDIA GTC 2026 - March 16, 2026 - HPE (NYSE: HPE) today announced a significant expansion of the NVIDIA AI Computing by HPE portfolio, redefining how enterprises deploy, operationalize, and scale AI. Our bare metal GPU servers provide the robust, scalable, and secure environment you need to train, refine, and deploy AI applications for the maximum competitive edge. Local deployment offers faster iteration, lower latency, full control, predictable costs, and secure data. GPU: NVIDIA RTX PRO Blackwell (96 GB VRAM, 5th-gen Tensor Cores) for training/inference; rack-ready for 2U-4U servers. Enterprises are seeking solutions that can handle complex workloads, from machine learning training to real-time inference. As an ultra-scalable platform it features the latest Nvidia Blackwell and Hopper GPUs alongside Intel Xeon processors.
