

# Router has no wireless connection despite fiber optic connection

## Overview

---

Restarting your router, checking your modem connection, and resetting network settings often resolve the problem quickly. This morning my ISP upgraded my Internet connection from a standard coaxial cable and Cisco modem to a fiber optic cable and Hitron modem Model Name NOVA-2004. The dreaded "WiFi connected, no internet" error is one of the most common networking problems across Windows, Mac, iPhone, and Android devices. Contact Your Internet Service Provider (ISP) There's a special kind of digital limbo that many of us have experienced: your computer or phone proudly announces it's connected to Wi-Fi, showing full bars, yet when you try to browse the web or check your email, you're met with that dreaded "No.
