

# Samoa pigtail fiber optic cable

## Overview

---

The project aimed at improving Samoa's international broadband connectivity, which involved the development and operation of a fiber optic submarine cable system (SCS) that would link Samoa to Fiji and provide a cost-effective connectivity to the rest of the world. High quality connectivity via state-of-the-art fibre optic cable technology will stimulate Samoa's ICT growth and economy. Achievement of the lowest possible unit cost per Mbps and an immediate ongoing reduction in access to the Global Internet Network. By combining factory-installed connectors with spliced bare fiber, pigtailed ensure that network installers can create. Compared with quick termination or epoxy and polish connections placed on the field. FS fiber optic pigtailed offer a fast way to make fiber optic communication devices in the field by fiber splicing, fully manufactured and tested by industrial standards.
