

**ZTP Thermal & Power**

# **Serbian Standard Optical Attenuator**

## Overview

---

An optical attenuator, or fiber optic attenuator, is a device used to reduce the power level of an optical signal, either in free space or in an optical fiber. The basic types of optical attenuators are fixed, step-wise variable, and continuously variable. The power reduction is done by such means as absorption, reflection, diffusion, scattering, deflection, diffraction, and dispersion, etc.

## Serbian Standard Optical Attenuator

---

### **PRO-ATTN-STPC-5DB , Industry Standard , Fiber Optic Attenuators**

This is a simplex SMF OS1 fiber optic attenuator, used in fiber optic links to reduce or attenuate optical power. This fixed value attenuator will reduce optical power by 5dB. It uses male to female ST

## **SC/UPC Fiber Optic Attenuator 1-20dB With Metal**

The SC fiber optic attenuator can provide a stable attenuation from 1 to 20dB at both 1310nm and 1550nm transmission windows. The plug type of this attenuator is

[Read More](#)

## **Fixed Optical Attenuators**

FOA is a plug-type single mode attenuator (multimode fiber attenuators also available).

It is used directly on the fiber optic connectors and provides a fixed level of optical attenuation. It has low return loss
