A New Generation of GaN Devices to Meet AI Server Power Demands

As server power demand is set to increase 2x-3x, designers now face an even tougher challenge to satisfy the demands for greater power delivery and significantly higher efficiency within the CRPS

Chroma 62000D Series Bidirectional DC Power Supply

Chroma 62000D programmable bidirectional DC power supplies provide both power source and load characteristics, ideal for testing renewable energy power systems such as PV, storage, and EV

[Read More](#)

The evolution of power supply unit designs for servers

For this article, I will focus on the trends around the server PSU subsystem and the

Generation 1 and Generation 2 architectures. The PSU architecture has two stages: a power factor
