

Slovenian complete electrical distribution box assembly company

Overview

The company from Slovenia specializes in the assembly and wiring of electrical cabinets for industrial applications. Power plants input generated electric power into the transmission network; five distribution companies and high-voltage network consumers offtake electric power from the transmission network. We have a 100-year tradition in successfully running business both at home and abroad. Available are TTA (type-tested assembly) switchboards, manufactured according to an adopted type or system with no changes and PTTA (partially type-tested assembly) switchboards, which include partially type-tested parts, with the latter derived from standard parts and suitably tested.
