

Smpte standard optical cable

Overview

SMPTE fiber cable is a hybrid fiber-copper cable defined by the SMPTE 311M standard. This standard describes the minimum performance for a hybrid cable containing single-mode optical fibers and electrical conductors to convey signal and control in a variety of environments where moisture, weather, and ozone resistance are required. Belden's SMPTE Cable Assemblies are designed for high-definition (HD) cameras and send multiplex audio signals and video signals to deliver superior performance.
