

Splicing 12-core optical cable with 6-core optical cable

Overview

Learn how to splice fiber optic cable using fusion splicing with this complete step-by-step guide. Another method of connecting optical fibers is termination or connectorization, which consists of processing the end of a fiber optic bundle so that it can be connected to other fibers or devices through fiber optic. However, not all fiber optic cables have the same core diameter, which affects the amount of light that can pass through them.

Splicing 12-core optical cable with 6-core optical cable

12 port Outdoor Fiber Distribution Box IP65 for FTTH Network

It is widely deployed in residential premises, business buildings, and villas. The enclosure features two cable inlet and 12 cable outlet port,
