

Sri Lanka 48-core fiber optic distribution frame

Overview

It is used as a termination point for the feeder cable to connect with drop cable in FTTx network system. Fiber Patch Panel, also known as optical distribution frame units, are installed within the 3U height & 19-inch standard distribution frame into the ODF, which offer flexible cabling access. The 48-port design accommodates a large number of fiber optic connections, making it suitable for expansive data centers and telecom applications, ensuring efficient space utilization and organization. Constructed with high-quality materials, this terminal box offers robust protection against. We carry a comprehensive product range with focus on premier performance characteristics enhanced for the South Asian region. We are a complete telecom solution provider, specializing in high performance data networking and interconnectivity solutions. Premium-Line Systems GmbH offers the wide range of solutions to build structured cabling systems based on fiber-optical technologies.
