

Steel rope plus optical cable

Overview

A high strength, low stretch, smooth rolling, stable, non-rotating rope, engineered to resist wear with integrated optical cables for data & communications. The compacted and densely concentrated metallic cross section of the FLC track rope guarantees a higher breaking load whilst the outer interlocking "Z"-shaped layers give the rope a smoother profile, reducing fatigue caused by the interface between rope and sheaves and rollers. Smoothed in five different constructions: 7x7, 6x19, 7x19, 6x37 and 18x7 Available as a rotary wire rope. Optical attached cable (OPAC) is a type of fibre-optic cable that is installed by being attached to a host conductor along overhead power lines. Our product range and team of experts can help you face the challenges of an ever changing industry.

Steel rope plus optical cable

Armored Fiber Optic Cables Ruggedized Military and

OptoSpan's steel armored tactical fiber optic cables are available for 10G, 40G, and 100G applications that require MTP/MPO, LC duplex fiber patch, and breakout
