

Swiss Active Optical Cable QSFP-DD

Overview

The 400G to 8x53G AOC cable is perfect for connecting host adapters, switches, and servers in 8x53G Gigabit Ethernet lines using OM3 or OM4 cables. Eight distinct 53G SFP56 multiport ends are connected to a single 400G QSFP56-DD connection via the high-speed data rate. Amphenol QSFP DD to QSFP DD 200G Active Optical Cable assemblies increase the number of lanes from 4 to 8 and double the port density as compared to 100G QSFP28 AOC. Advancing industrial performance with engineered materials and high-precision laser technologies that drive next-generation manufacturing and research applications. 3bs Annex 120E over operating case temperature 0 de voltage generated by the host.

Swiss Active Optical Cable QSFP-DD

Customized 200G QSFP-DD Active Optical Cable

The 200G QSFP-DD active optical cable is designed for use in 200 Gigabit Ethernet links over OM3 multimode fiber. This active optical cable is compliant with QSFP
