

# **Switch with 2 optical ports and 24 electrical ports**

## Overview

---

The Intellinet Network Solutions 24-Port Gigabit Ethernet PoE+ Switch with 2 SFP Ports is equipped with an LCD status screen on the front that provides real-time power information. This includes how much power each connected PoE device consumes, the combined used-power total of all connected devices and the total power available. Equipped with 24 auto-sensing 10/100/1000 Mbps RJ45 Gigabit Ethernet ports, this switch offers plenty of performance for your computers, servers and other networking devices. In addition, two small, form-factor pluggable GBIC module slots (SFP) provide fiber connectivity for greater distances.
