Syrian Optical Network Switch 100G

Overview

The QSFP28 module provides 100GBase-LR4 throughput up to 10km over a standard pair of single-mode fiber (SMF) with duplex LC connectors. The 100G QSFP28 module solution provides high-performance 100GbE connectivity for data centres, enterprise core & distribution layers, computing networks and service provider applications. This category offers switches of various designs with a maximum data rate of up to 100G. If you're upgrading leaf-spine fabrics, stitching campus buildings, or extending metro/edge links, a reliable Optical Transceiver Module at 100 Gbps is table stakes. This network solution adopts NADDOD optical module connectivity products, which can smoothly complete the 100G~400G network architecture upgrade; between Leaf switch and ToR switch, it provides higher data transmission rate and higher reliability while effectively reducing network latency.

Syrian Optical Network Switch 100G

100G Optical Transceiver

100G Optical Transceiver 100G optical transceiver has a variety of packaging forms, including CFP/CFP2/CFP4, CXP and QSFP28. QSFP28 optical transceiver has
