

# Tail Fiber Round

## Overview

---

FC-FC Type: Commonly known as circular to circular tail fiber, typically used for jumpers between ODF racks. A tail fiber, also known as a fiber optic patch cord, consists of a connector on one end and a cut end of the fiber optic cable core on the other. Advances in deep learning-based protein structure prediction, such as AlphaFold2- multimer (AF2M) and ESMFold, provide opportunities for. \*\* Your 'Available to spend' is the estimated amount you can spend using Pay in 4 on your Afterpay account, which you can view in the Afterpay app. Adsorption of R pyocins to target strains occurs by the interaction of tail fiber proteins with core lipopolysaccharide (LPS).

## Tail Fiber Round
