

# Tajikistan Double-Sheathed Flame-Retardant Optical Cable Model

## Overview

---

Indoor/Outdoor steel tape armoured (CST) double LSHF-FR sheathed optical cable with 2 - 24 fibres. They are compliant with the latest IEC requirements S670T cables meet the requirements of IEC 60793-1 and IEC 60792-2 (breakout style). The breakout components are cabled around a central member providing additional tensile strength to the e tire construction. Optical fibres are housed in loose tubes that are made of high-modulus plastic and filled with tube filling compound. Flame-retardant optical cables are an essential component in the telecommunications industry, ensuring the safety and reliability of data transmission.
