

The cable tray is made of iron

Overview

Their construction is based on the international standard IEC 61537, which specifies the requirements for cable tray systems, tests, and specifications. Common cable trays are made of galvanized steel, stainless steel, aluminum, or glass-fiber reinforced plastic. The galvanization process involves applying a zinc coating to iron or steel to protect the metal from corrosion.

The cable tray is made of iron

Cable Tray Management System , IES Manufacturing

IES provides cable trays in Galvanized Iron (GI), Stainless Steel (SS), Aluminium, and Powder-Coated finishes. In addition, we fabricate cable tray supports, J-bolts (JBS), corner fittings, and other
