

The distribution box has been reversed and moved to the back

Overview

The good news is USPS has optimized their routing for the quickest total time, so temporary backwards movement is usually resolved quickly. One common reason for significant detours is an error with the destination address or barcode routing number. This unexpected turn can be frustrating, but there are a couple of scenarios that could have led to this situation. But fear not, because in this article we're going to dive into the reasons why packages get sent back and what you can do to prevent it from happening to you. A USPS regional facility, also known as a USPS distribution center or regional distribution facility, is a strategically located processing and distribution center operated by the United States Postal Service.
