

The door of the distribution box should be labeled

Overview

Measures: Generally, according to the requirements of codes and standards, the door of the lighting explosion-proof distribution box (board) should be affixed with a circuit system diagram, and the name of the circuit should be labeled on the brake, especially when. Every home relies on a breaker box (also called a service panel or distribution board) to manage and protect its electrical circuits. Yet, one of the most overlooked steps in electrical safety and convenience is correctly labeling each circuit breaker. This is an internal LLNL standard meant to guide the design of new facilities, facility modifications, and. When each circuit is clearly marked, maintenance crews, electricians, and even first responders can quickly identify key components during an emergency.

The door of the distribution box should be labeled
