

The electrical distribution box is on the left side of the entrance

Overview

The box located on the side of a house, often made of metal or heavy plastic, is the primary electrical service entrance equipment. This assembly is the gateway where the utility's power grid connects to the home's internal wiring system. Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. In emergencies or maintenance needs, technicians can quickly reach it without needing access to. Inside, you'll find parts like circuit breakers and fuses that protect the system from problems like overloads and short circuits.
