

# **The fiber optic connection to the router is very slow**

## Overview

---

With upload and download speeds that often exceed 1,000 Megabits per second (Mbps), fiber optic internet has the capacity to provide a seamless online experience while powering all of your connected devices at once. Before we dive into the reasons behind slow fiber Wi-Fi, it's essential to understand how fiber-optic internet works. Fiber-optic internet uses thin glass or plastic fibers to transmit data as light signals. You can fix most of these issues yourself; some only take a few minutes—we'll start with eight of the most common. It is possible that you have a more complicated issue on your hands; we'll go over these instances, too. Due to a high amount of signal loss in my apartment, the connection from my Asus router does not reach the bedrooms.
