

Tools for constructing fiber optic cables in the field

Overview

Fiber Optic Tool Kits The fiber optic installer needs a complete set of fiber optic tools and test equipment, plus supplies used in pulling cables, splicing and terminating them, then testing and troubleshooting the installation. An OTDR helps pinpoint faults, breaks, and splices along a fiber link with serious accuracy. Our fiber optic termination kits, inspection tools, and cleaning supplies allow both lab and field technicians to complete reliable assembly of fiber optic systems. CommScope features a family of tools and components for the installation, repair and maintenance of fiber cables, including prep and termination kits.
