## Uninterruptible power supply

OverviewCommon power problemsTechnologiesOther designsForm factorsApplicationsHarmonic distortionPower factor

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries, supercapacitors, or flywheels.
