

Transportation of Photovoltaic Distribution Boxes

Overview

Safe transport of photovoltaic modules is based on several key principles. First of all, original manufacturer packaging should be used, as it protects the panels from mechanical damage. Proper placement of pallets in the trailer and securing them in place is also essential. We in HBOWA supply tier-1 solar panels and LiFePO4 batteries to our partners across the globe post ensuring that the panels are handled and packed well with the best practice for solar module transportation. In our Czech branch, we provide warehousing services at our state-of-the-art facility in Brno and road transport (mainly FTL) from seaports to warehouses in one of the projects.

Transportation of Photovoltaic Distribution Boxes

Logistics solutions for the Solar industry

With 30 years of dedication to renewable energy services out of our 50 years of global freight forwarding experience, we have the experience and solutions you
