Plant Concept with Many Intelligent Features
More Technical Highlights
First Tests For Earthquake Resistance Successfully Passed
Innovative Hollowcore Slab Production Planned For 2019
The new construction system was tested for earthquake resistance already in October 2018. For testing, a 9-story unfinished residential building was exposed to an earthquake with a force of 9 on the Richter scale. The KazNiisa Institute for Seismology generated, with special vibration centers, high vibrations analogous to a real earthquake. "The sp See more on bft-international
