

Venezuela Multimode Logging Fiber Optic Cable System

Overview

Multi-mode optical fiber is a type of optical fiber mostly used for communication over short distances, such as within a building or on a campus. Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be propagated and limits the maximum length of a transmission link because of modal dispersion. ApplicationsThe equipment used for communications over multi-mode optical fiber is less expensive than that for.

Venezuela Multimode Logging Fiber Optic Cable System

Multimode Optical Fiber Selection & Specification

Laser-Optimized 50-µm MultiMode Fiber (LOMMF) is the recommended fiber type in today's Local Area Network (LAN) and Data Center (DC) environments in conjunction with 850 nm vertical-cavity
