

Weak current distribution box wall thickness

Overview

0mm steel plate spray molding (white), bottom box into the wall to provide ϕ 25mm x10 + ϕ 20mmx10 entry hole, bottom box into the wall to provide ϕ 25mm x7 + ϕ 20mmx7 entry hole. * For different colours and thickness, please refer to the details. The distribution box is to assemble the switchgear, measuring instruments, protective appliances and auxiliary equipment in a closed or semi closed metal cabinet or panel according to the electrical wiring requirements to form a low-voltage distribution device. Box shall be rigid free standing & floor mounting type and comprise of structural frames enclosed completely with specially selected smooth finished cold rolled steel. (power outlets and appliances), weak current systems handle information and signals rather than electricity. The invention discloses a strong and weak current comprehensive distribution box, which relates to the technical field of strong and weak current and comprises a box body, wherein the bottom surface of the box body is fixedly connected with a base, the front side of the left end of the box body is.
