

Weight of 1 reel of optical cable

Overview

Portable optical fibre cable units are delivered on special 1-hand reels, which have been developed just for these purposes. Unreeling for use and reeling back after use are very easy! The weight of an empty reel is 3,4 kg. Used by electric utilities on transmission lines with the voltage of 35 kV and higher for creating optical communication lines and protecting the power lines from lightning strikes. It is used with industrial jumpers, network cables, audio and video cables, and offers significant cost savings through direct cable integration into reel. Thanks to the patented fiber optic connection they are quicker to install than any copper cable.

Weight of 1 reel of optical cable

Cable Reel Capacity Calculator , How Much Cable Fits

A Cable Reel Capacity Calculator is a tool designed to determine the maximum amount of cable that can be wound onto a particular reel based on its
