

ZTP Thermal & Power

Weight of 400 galvanized cable tray

Overview

This tool estimates tray self-weight from material density and an approximate metal volume. For solid and perforated trays, it treats the tray as a formed sheet: Developed sheet width per meter: $Dev = W + 2H + 2R$ Metal volume per meter: $V = Dev \times t \times 1 \times (1 - Open\%)$. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. The BFR Series welded steel wire trunking is the ideal solution in terms of cost-effectiveness and installation flexibility, thanks to the exceptional simplicity with which they can be adapted to routing needs, without any need for special accessories or tools.
