

West Africa Pipeline Optical Cable

Overview

The West Africa Cable System (WACS) is a linking with the along the west coast of Africa that was constructed by. This 17,200 Km long fiber optic cable was built by MTN along with a consortium of 16 leading international telecom carriers. TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations. The launch of 2Africa enables us to offer our customers seamless connection between Africa and Europe, together with our SEA-ME-WE 5 and AAE-1 subsea cable resources to further extend to Asia, which is an important milestone of our global development strategy," said Jessica Gu, Director & Chief.
