

# **What does the ST6355 interface connect to**

## Overview

---

The single wire interface module (SWIM) and the JTAG/serial wire debugging (SWD) interfaces facilitate communication with any STM8 or STM32 microcontroller operating on an application board. Contrary to the ST-Link/V2, this one does include a SWO pin AND a USB/UART interface. It is based on STM32F334C8T6 and includes ST-LINK/V2-1 embedded debug tool interface, high-brightness LED dimming with buck converter, buck-boost converter, LEDs, an push-buttons.
