

What is GYFT fiber optic cable

Overview

Stranded Loose Tube Non-Metallic Strength Member Armored cable, or GYFTA53, is a type of fiber optic cable that is designed to transmit data over long distances. This cable is widely used in telecommunications applications and is known for its durability and reliability. GYFTA fiber optic cable is stranded loose tube structure, The cable tubes, which are filled with filling compound, are stranded around the FRP strength member. GYFTY53 is composed of 5 parts: Then what the true meaning of each part?

Below are the detail descriptions of each part. Reinforcement Defalut (No symbol): Metal enhancement F: Non-metal enhancement N: No enhancement 3.

What is GYFT fiber optic cable

What does GYTS GYTA GYFTY53 mean? -- Naming

In different applications environments, people have different requirements for the structure of optical cables. Frequently we see many types
