

What is SJX a distribution box

Overview

SJX protection double power switching box is suitable for small power control circuits in hotels, ports, stations, airports, warehouses, factories and mines, etc. , as line control, overload protection, short circuit protection and line switching purposes. A distribution box, also known as a distribution board or panel, is the central unit that distributes incoming electrical power to various circuits. Understanding their distinct functions helps ensure safe, efficient, and compliant installations. It stripped away the jargon and gave us a "Golden Rule" for identifying these boxes instantly. Category: Products Summary: Specializing in the research and development, design, manufacture, processing, sales and installation of high and low voltage complete sets of electrical equipment, it is a professional manufacturer of smart grids, high voltage ring network cabinets, medium and low.
