

# **What is an industrial-grade switch in Latvia**

## Overview

---

An industrial grade Ethernet switch is a network device specifically engineered to operate in challenging industrial settings. These switches come in two types, managed and unmanaged offer Gigabit, and PoE capabilities with various industry certifications.

## What is an industrial-grade switch in Latvia

---

### **What is an industrial switch? And what are the differences between it**

An industrial switch is a network communication device specifically designed for industrial environments, facilitating efficient and reliable data transmission between devices in industrial

[Read More](#)

### **What are industrial grade switches?**

Industrial grade switches, also known as industrial Ethernet switches, are ruggedized networking devices engineered to meet the unique demands of industrial applications. Unlike commercial
