

What is the mesh cable tray inside the server rack called

Overview

Channel Cable Management Trays, also known as cable trays or wire mesh cable trays, are designed to organize and protect network cables within server racks and cabinets. Panduit offers industry-leading cable routing systems as part of comprehensive, integrated data center solutions to effectively manage and protect high-performance communication, computing, and power cables. A server rack is a metal frame that holds and organizes your IT equipment—like servers, switches, and power supplies—all in one place.
