

# What kind of inspection batch is required for outdoor distribution boxes

## Overview

---

\*Industrial Scenarios (workshops, outdoors): Inspect once every 3 months, adding oil stain/dust cleaning and inspection of vibration-resistant/corrosion-resistant components. \*Protection: Proper sealing of idle holes, no blockage of drainage holes (outdoor/humid scenarios). Are there any special things I should pay attention to?

Answer You perform a visual inspection and then measure the continuity of the protective conductor up to. Distribution box certification requires standardized testing processes and comprehensive documentation to verify safety and performance.
