

# What kind of optical module does Huijue BBU use

## Overview

---

BBU end can be connected to CWDM coarse wavelength division multiplexer through CWDM color optical module and OS2 single mode optical fiber patch cord, and then transmitted to CWDM coarse wavelength division multiplexer with one or two optical fibers. AAU, RRU, and BBU are key components in a telecom network, particularly in modern wireless communication systems like 4G and 5G. Handles baseband signal processing, transmission scheduling, and network interfacing. In 4G network, the optical modules used to connect BBU and RRU are mainly Gigabit to 10 Gigabit optical modules; in 5G network, the optical modules used to connect BBU and RRU are mainly 25G rate. This document describes the exteriors and functions of a BBU5900 as well as the configurations, functions, application scenarios, and specifications of boards in the BBU5900 to help users comprehensively understand the functions of BBUs. Huijue Group's Mobile Solar Container offers a compact, transportable solar power system with integrated panels, battery storage, and smart management, providing reliable clean energy for off-grid, emergency, and remote site applications.

## What kind of optical module does Huijue BBU use

---

### **Energy Storage Cabinet, energy storage system, New Energy**

Huijue Group offers efficient residential energy storage systems, with power ranging from 5kW to 20kW. All our products are fully certified and supported by global service to ensure reliability, long life, and
