

# **What material is a 60mm cable tray made of**

## Overview

---

Made from passivated A2 stainless steel (AISI 304), it delivers Class 9C corrosion resistance with over 850 hours of durability in harsh conditions—making it ideal for industrial or commercial containment systems. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to silicone, overheating or. Ventilated cable tray systems are commonly fabricated from a corrosion-resistant metal or from a metal with a corrosion-resistant finish. Steel is one of the most popular materials for cable trays, and it's not hard to see why.
