

What s on the front of the relay protection cabinet

Overview

A control switchboard with front equipment mounting provisions and enclosed sides and top. Long term cost reduction (TCO) for trainings and maintenance by reduce variety of relays A fast and selective arc fault mitigation for air-insulated LV & MV switchgear and Relion protection and control relays and sensor. Cabinets and devices of relay protection and automation (RPA) manufactured by Radiy are a modern solution for control, automation, protection, monitoring and signaling at power facilities. Protective relays and devices have been developed over 100 years ago to provide "lastline"of defense for the electrical systems. The specification relates to the Onshore Compensation Compound (OCC) and Offshore Substation Platform (OSP).
