

What size is the fiber distribution box in the low-voltage vertical shaft

Overview

The NSDF is the industry's only fiber distribution frame that provides fiber connectivity and vertical cable management in standard 19" racks/cabinets, with the highest fiber density/in² in the industry today. It is used for straight joint, branch and pass through connectivity in FTTx Networks. To ensure consistent performance and longevity, it is essential to adhere to strict technical specifications.

What size is the fiber distribution box in the low-voltage vertical sh

one distribution boxes

imum of 6 or 12 links. The self-assembly zone distribution box can be installed in technical flooring or technical ceilings and can house all LC. 2 fibre optic modules. It can accept up to 6 fibre
