

What supports are used for mesh cable trays

Overview

Cable Tray Supports: These include trapeze hangers, center-span supports, and wall brackets that anchor the entire system to the building structure (ceiling, wall, or floor). The cable support lengths and fittings can basically be designed as cable trays, cable ladders or mesh cable trays, in which cables are routed. Fittings can, on the one hand, be used for horizontal or vertical changing of the routing direction or, on the other, to change the height or width of the. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Cable trays are a safe, durable, and cost-effective method of cable management for commercial and industrial applications.
