

Where are 1c ceramic ferrule manufacturers located

Overview

, which together account for a substantial portion of global zirconia ferrule production capacity. Ceramic ferrules and sleeves are often used in optical connectors, attenuators, fiber stubs, and other optoelectronics requiring low signal loss. They are made of zirconia ceramic, which offers the highest performance and durability of all ferrule material types. China is the largest market, with a share over 35%, followed by USA and Japan, both have a share over 25%.

Where are lc ceramic ferrule manufacturers located
