

**ZTP Thermal & Power**

# **Where are optical fibers and optical cables used**

## Overview

---

Glass optical fibers are almost always made from, but some other materials, such as,, and as well as crystalline materials like, are used for longer-wavelength infrared or other specialized applications.

## Where are optical fibers and optical cables used

Glass optical fibers are almost always made from silica, but some other materials, such

as fluorozirconate, fluoroaluminate, and chalcogenide glasses as well as crystalline materials like sapphire, are used for longer-wavelength infrared or other specialized applications. Silica and fluoride glasses usually have refractive indices of about 1.5, but some materials such as the chalcogenides can have indices as high as 3. Typically th
