Overview

Choose from interactive classroom training and hands-on sessions in our modern training facilities, e-learning courses and webinars online, or courses tailored to your specific needs on-site, in your own language. Electrical relay protection and coordination are essential for the reliable and safe operation of electrical power systems. Hitachi Energy' Protective Relay School webinars are specifically designed to provide a strong foundation and fundamental principles. Join leading authorities with expertise across power systems to learn about increasing safety, cybersecurity, communication, protection and control, plus so much. This course covers basic relay operating principles for various types of protective relays providing workers great insight to the importance of.

Where can I find courses on relay protection in South Korea

Electrical relay protection and coordination training

This training is designed for electrical engineers, system operators, and protection specialists seeking to enhance their skills in designing and implementing effective protection systems.
