

# **Where is the LC adapter for the fiber optic tester**

## Overview

---

The T020-001-LC50 FC to LC 50/125 Adapter converts a native FC fiber female port on the T020-001-PSF Multi-Function Optical Fiber Cable Tester to an LC female port for 50/125 multimode cable testing. The following article describes how to test an LC to LC fiber link using TIA/EIA Method B for Multimode and TIA/EIA Method A. Testing a fiber optic cable with LC connectors is crucial for verifying that your fiber optic network meets industry standards for performance and reliability. Find portable power meters, visual fault locators, and multi-function testing tools. OptoSpan's FIBER-TEST-LC (For LC, SC, FC, ST, E-2000 connectors) is a simple fiber optic cable tester that uses 650nm red light to pinpoint the location of any breaks and cracks in the single-mode or multimode fiber for up to 3km.

## Where is the LC adapter for the fiber optic tester
