

# **Where is the fiber optic cable on the island**

## Overview

---

Many cables terminate in Newfoundland and Ireland, which lie on the from, UK to, US. Late in the 20th century, lost most of their North Atlantic telephone traffic to these low-cost, high-capacity, low- cables. The Hawaiian Islands Fiber Link (HIFL) is a new underwater cable system that will support faster and more reliable internet throughout Hawai'i. Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more.

## **Transatlantic communications cable**

All cables presently in service use fiber optic technology. Many cables terminate in Newfoundland and Ireland, which lie on the great circle route from London, UK to New York City, US. There has been a succession of newer transatlantic cable systems. All recent systems have used fiber optic transmission, and a self-healing ring topology. Late in the 20th century, communications satellites lost most of their North Atlantic telephone traffic to these low-cost, high-capacity, low-latency cables. This a
