

Where is the fiber optic panel port

Overview

That's the port where a cable will attach to carry data from the fiber optic network to your device. Fiber optic patch panels are enclosures that act as a distribution hub for fiber cable. A bulk (multi-strand) fiber cable enters the patch panel and then each fiber strand is separated into individual strands or pairs of strands. Patch panels are rack-mountable onto 19", 21" and 23" rack systems, and some are designed to be wall-mountable.

Where is the fiber optic panel port

1U Rack Mounted 24 Port Fixed Fiber Patch Panel,24

The 24 port rack mount fiber patch panel is designed to realize the connection between external optical fiber cables and pigtailed. It is used for branch connection
